

POCKET FOUNTAIN PEN
USER MANUAL

What is the Pocket Fountain Pen?

The Pocket Fountain Pen is a compact and versatile apparatus, designed with an interchangeable cap system (clip, clip-less, stylus and keychain).

Featuring the Schmidt FH 241 fine point nib with a refillable K6 ink cartridge, the Pocket Fountain Pen also presents with a 0.5 PRS interchangeable ballpoint head.

With the cap off, the Extender transforms the Pocket Fountain Pen from 100mm to a 128mm barrel. Also precision machined in brass, the Extender assures a longer version of an already versatile refined writing instrument.

The Pocket Fountain pen is a sleek and more modern approach to an every day writing instrument. It turns heads and lets people know that you care about quality and know the best when you see it. It is simple, seamless and makes quite an impression on anyone who holds one in their hands. The Pocket Fountain Pen comes in Black Oxidie, Brushed Chrome, and Raw Brass.

Our pens have it all: functionality, an aesthetic design, and purpose. When you own a pen by Inventory, you'll also own a piece of design innovation and never want to go back to regular pens again.

Fine Writing Nib

The FH241 fountain pen nib unit from SCHIMDT® has a wing span of 7mm and is crafted from stainless steel with an iridium point for durability. The nib comes in Blank Stainless Steel for the Black Oxide and Brushed Chrome finished pens, and plated gold for the Raw Brass pen.

Rollerball Writing Head

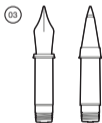

This rollerball head is a classic and can be used for more precise writing and signatures. It has a traditional look and feel that can also be used with the fountain pens ink cartridges. It's smooth and the ink does not dry out easy.

01 Clip

The Pocket Fountain Pen clip allows it to be highly portable. It can be clipped to a pocket and you'll always know it's there.

02 Cap

The cap is made to prevent damage to the nib/rollerball. It is highly durable and will protect your pen from any fall, you can count on it.

03 Nib / Rollerball

It's interchangeable nib allows for writing with a little more personality in addition to smooth precise writing with the rollerball.

04 Grip

This piece allows for an easy grip of the pen and ensures that it does not slip out. You can count on it to stay in your hand.

05 28mm Extender

The extender adds an inch of length to the pens design which makes it adjustable to any hand size. It also allows for the ink converter to be used.

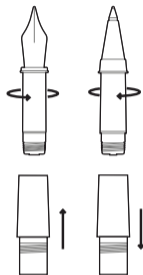

06 Barrel

The barrel houses the ink cartridge and can easily be twisted off to allow the extender to be added on. It fits comfortably on the hand.

Body/Barrel

The Pocket Fountain Pen presents itself with a 100mm barrel while the Extender Kit adds length: specifically 28mm. This adds an entire inch to the pen size and makes it easier to rest on ones hand in addition to adding extra comfort.

Interchangeable Writing Head

With the SCHIMDT® Cartridge-Rollerball System, the 0.5 point ballpoint tip is never discarded, using instead the disposable ink cartridges that also fit with the FH Nib. Both Nib and Ballpoint screw into the gripper jacket of the Section.

PFP (Disposable Cartridge)

This cartridge is simple and easy to insert inside of the pocket fountain pen. Removing and replacing the cartridge only takes a few twists and your pen is ready to go.

PFP + Extender (Refillable Converter)

The pen extender allows for the use of a refillable cartridge called the Refillable Converter. This ensures that you always have a little extra ink by your side and gets rid of the inconvenience of throwing your old cartridge away.

Clipless

This cap design is made for those who seek a sleek yet traditional pen appearance. You can't go wrong with this pen cap.

Keychain

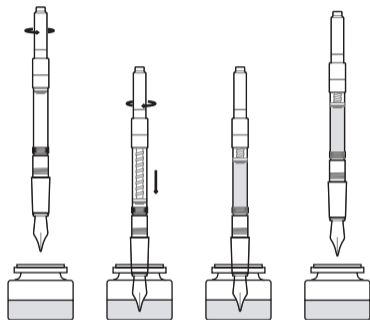

For those who are always on the go and are tired of losing pens. This cap allows for reliable and easy carriage.

Stylus

A pen cap for all purposes. With this pen cap option you're ready to write anywhere. Signing digital and physical documents in a breeze.

- A. Remove the K6 converter from the pen.
- B. Twist plunger mechanism counter-clockwise until seal reaches opening.
- C. Place converter tip in inkwell.
- D. Twist plunger mechanism clockwise to draw ink into reservoir, until chamber is filled.
- E. Insert K6 into fountain pen head.

1. Attach K6 converter to pen grip / fountain pen head.

2. Slide 28mm extender piece onto pen.

3. Secure by twisting in place.

4. Attach, twist pen barrel to the back of the extender.

Maintenance

To ensure that the Pocket Fountain Pen is kept clean and has a prolonged life, it is recommended that the pen encasing be cleaned with water. Simply, remove the ink from the inside of the pen and dip it in water. This will not affect or ruin the quality of the material on the pen.

It is also important to seal the pocket fountain pen after use and to ensure that the pens components are tightly attached. This is to prevent the nib from getting damaged and to prevent any loose pieces from falling off.

INVENTORY

“House of Invention.”

We're an independent design house specializing in refined goods and fine writing instruments. We're product designers, obsessing in quiet madness over the fine details.

We're seeking to elevate and redefine the modern writing experience. In the age of digital tools and the fast-changing landscape of technology, we hope to bring a renewed emphasis on the importance of analog tools — objects of desire and personal items that have a sense of permanence and sentimentality.

Our writing instruments are precision machined from solid metal stock with an updated aesthetic for the modern audience, and our machining process is precise to a fraction of a millimeter. We only use high quality materials and source the finest parts available — like German engineered mechanisms, fine writing nibs, and refills.

We have a penchant for simplicity, for pure forms and seamless objects — we keep our products unadulterated by style and over-design, and our tools are built to last a lifetime.

The Inventory Craft Assurance

INVENTORY Fine Writing Instruments are covered by a lifetime warranty and guarantee against all mechanical failure and defects in materials or workmanship. The warranty does not cover ordinary wear or damage from misuse, nor does it include ink refills, cartridges, and fountain head nibs. In the case of defects listed under the warranty, all components will be repaired or replaced free of charge.

To file a claim on material or product defect, please send your INVENTORY Writing Instrument to the listed address with the original packaging and contents. Please provide a copy of the receipt as proof of purchase, or your order number and information.
